

GRID CAPACITY, DELIVERED AS A SERVICE. NO SOFTWARE PURCHASE.

FlexEnergy aggregates behind-the-meter residential, commercial, and agricultural resources into one virtual power plant: firm, dispatchable capacity from your own customers at a fixed \$/kW-year, with no API or device fees.

HOW THE PROGRAM RUNS

ENROLL

Simple sign-up for residential, commercial, and agricultural customers — devices connected in minutes.

MANAGE

Devices onboarded to the Edge DERMS platform. Incentives, support, and administration handled end to end.

OPERATE

Daily dispatch and load shaping, with M&V of capacity delivered.

FLEXENERGI — SERVICE AT A GLANCE

Pricing model	\$/kW-yr, fixed	Priced like the asset it replaces
Resource mix	Res + C&I + Ag	One portfolio, one contract
Dispatch modes	Load Shaping	Peak shaving, load build, or managed EV charging
CAISO integration	DRRS-registered	Assets registered into CAISO DRRS; PDRs created as needed
Resource adequacy	Scales into RA	FlexEnergy helps the portfolio qualify as an RA resource as it grows
Delivery model	Turnkey	Recruit → manage → operate

WHAT IT IS

ONE VIRTUAL POWER PLANT, RUN END TO END

FlexEnergi recruits and aggregates distributed energy resources behind the meter and operates them as a single virtual power plant. The model is fully turnkey.

Targeted customer marketing and recruitment, full program management, an edge-enabled DERMS platform, and all the operational support a program needs to run — provided as one service.

90+

INTEGRATIONS

Batteries, EVs, EV chargers, thermostats, water heaters, solar inverters, smart circuit breakers

WHAT YOU GET

LOAD SHAPING, ANY TIME OF DAY

FlexEnergi shapes load whenever it's needed — firm capacity across all 8,760 hours of the year, not just the peak.

FIXED \$/KW-YEAR

You pay a fixed price per kilowatt-year. No metering surprises, no settlement math — capacity priced like the asset it replaces.

A PORTAL FOR EVERY STAKEHOLDER

Purpose-built portals for residential customers, commercial customers, program managers, and grid operators — everyone sees exactly what they need.

FULLY TURNKEY

We handle recruitment, program management, the edge-enabled DERMS platform, and daily operations. You get capacity.

THE COMPANY

FlexEnergi, a subsidiary of Accurant Energy Holdings, is a grid-edge technology and services company based in Washington state, delivering always-on, dispatchable capacity from behind-the-meter assets across residential, commercial, industrial, and agricultural accounts. FlexEnergi is led by a team of industry veterans with decades of combined experience in demand response and distributed energy resources at leading utilities and technology companies. **Contact us to schedule a demonstration:** sales@flexenergi.com.

WHY A CCA RUNS A VPP — AND WHY FLEXENERGI

RESOURCE ADEQUACY, WITHOUT BUILDING

RA obligations grow while new-build capacity is slow and expensive. Aggregated behind-the-meter load is capacity you can count toward those obligations now.

FLEXENERGI Capacity is procured, not built — a fixed \$/kW-year price you can put in a budget. No software license, no shared-savings math.

CUSTOMER-OWNED LOAD, CUSTOMER-FACING VALUE

The flexibility already sits behind your customers' meters — water heaters, HVAC, batteries, EVs. A VPP turns it into a local program customers are paid to join.

FLEXENERGI We market, enroll, and support customers on your behalf, with a ground team in California — no added headcount on your side.

CAISO MARKET PARTICIPATION

A registered aggregation can serve RA and bid into CAISO demand response — turning peak management from a cost line into a revenue line.

FLEXENERGI DRRS registration, telemetry, and measurement and verification are part of the service — not a consulting add-on.

RELIABILITY AND RESILIENCE

Distributed flexible resources help during heat waves and supply shortfalls — the hours when statewide reliability is tightest and load growth is least forgiving.

FLEXENERGI Our edge-enabled DERMS keeps devices responding when the network is degraded, so capacity holds up in the hours it matters.

MISSION AND REGULATORY ALIGNMENT

A local, customer-facing VPP is exactly the community-benefit program CCAs were formed to run, and it shows your board and the CPUC the agency out ahead of DER growth.

FLEXENERGI Delivered as a service: no capital software purchase, and reporting your board and regulators can read straight out of the platform.

INCREASE CCA'S NAME RECOGNITION

Many customers still do not know who their CCA is. A paid enrollment program puts the agency in front of households and businesses with something concrete to offer.

FLEXENERGI Marketing, enrollment, and portals run under your brand, so the visibility and the customer relationship stay with the CCA.
